

## Client Success Story

### Supporting International Expansion Plan

“

After searching for a suitable solution that would integrate with our existing NetSuite ERP solution, ProScope provides the perfect fit. We are confident that it will bring significant benefits in relation to our financial and billing processes and in turn, the way in which we manage our projects.”

- ERP Project Manager at Amarenco

Leading independent solar power producer.

## Business Challenges

- Stakeholders suffering from a lack of a unified view of projects.
- Complex project tasks and milestones increasingly difficult to manage.
- Capturing, monitoring and maintaining specific project financial structures.
- Time lost with manual project billing tasks on every project.

## Solution

- Full integration with existing ERP system, NetSuite as well as Excel and MS Project.
- User friendly interface allowing real time monitoring and measurement of projects.
- Automation of processes to allow a more efficient method billing including the weighted milestone billing within projects.
- Enhanced project planning and mobilisation to assist with specific technical requirements in each project.

## Benefits

- Easily accessible real time visibility reporting across the project.
- Billing made in line with agreed timescales and automated weighted milestone billing.
- Advanced project procurement and requisitions, direct from the project.
- Managed applications for payments allowing for project based overheads, fixed fee, labour overheads and rule based engine flags any profitability warning.
