

A background image showing a golf course with green grass and trees in the foreground, and power lines and towers in the background under a clear blue sky.

Client Success Story

Enhancing NetSuite's core functionality for key project management activities

“

ProScope easily met all the criteria we required from a project management solution. The fact it integrates seamlessly with our new NetSuite platform guarantees that we will have greater visibility and control into our project management activities within a single solution.”

- Group Managing Director at
Ecosave

A Global independent Energy
Services Company

Business Challenges

- Time consuming job costing process.
- Disparate systems unable to provide a unified view of projects as they progress.
- Inability to allocate assets and equipment effectively.
- Lack of visibility of resource availability.

Solution

- Full integration with existing ERP system, NetSuite.
- Templates and ready-made structures let users automatically create a project.
- Built in costing estimator allows for scoping of equipment and resources.
- Inventory management.
- Enhanced project controls.

Benefits

- Seamless integration with NetSuite providing same familiar environment to operate.
- Job Costings and estimates can be quickly and easily pulled together and include profit forecasts.
- Key information from granular level to detailed project activities provide better visibility across the business.
- Gantt charts provide an easy to use drag and drop functionality allowing resources to be added or removed as the project requires.
- Easy to view activity trends for continuous improvement in project performance.
